# Timeline of Events

-  On January 31, HHS declared Coronavirus a Public Health Emergency in the US (<https://www.hhs.gov/about/news/2020/01/31/secretary-azar-declares-public-health-emergency-us-2019-novel-coronavirus.html>)  
As of Jan. 31, the Wuhan coronavirus is officially a public health emergency in the United States, Alex Azar, secretary of the US Department of Health and Human Services (HHS), announced at a White House press briefing.
-  On Jan. 31, the U.S. Centers for Disease Control and Prevention (CDC) **issued a federal quarantine for 14 days** affecting the 195 American evacuees from Wuhan, China. Starting Sunday, Feb. 2, U.S. citizens, permanent residents and immediate family who have visited China's Hubei province will undergo a **mandatory 14 days quarantine** and, if they have visited other parts of China, they would be screened at airports and asked to self-quarantine for 14 days. The last time the CDC had issued a quarantine was over 50 years ago in the 1960s, for smallpox.
-  President Donald Trump signed an order on Jan. 31 for the U.S. to **deny entry to foreign nationals who traveled to China** within the preceding two weeks, aside from the immediate family of U.S. citizens.
- On Jan. 30, the CDC had confirmed the **first case of person to person transmission in the U.S.:** <sup>[12]</sup> the husband of the Chicago, Illinois case who had returned from Wuhan, China on Jan. 13 and who tested positive for the virus on Jan. 24).
- CDC stated on Jan. 30 that "It is likely there will be more cases of 2019-nCoV reported in the U.S. in the coming days and weeks, including more person-to-person spread."<sup>[12]</sup>
- The virus had been confirmed in **5 states**.
- On Jan. 31, **New York City** health officials vehemently denied the rumor regarding a coronavirus case in the city <sup>[13]</sup>. On Feb. 1, however, the city's health commissioner did report that there was a test being performed on a person under 40 who had returned from China, developed matching symptoms, and tested negative to the seasonal flu.
- **Most US patients had recently visited Wuhan.**
- All of the first five U.S. cases were described as **mild**.
- A study on the first US case of novel coronavirus detailed mild symptoms followed by pneumonia ([https://www.cnn.com/2020/01/31/health/washington-coronavirus-study-nejm/index.html?utm\\_term=link&utm\\_medium=social&utm\\_content=2020-02-01T00](https://www.cnn.com/2020/01/31/health/washington-coronavirus-study-nejm/index.html?utm_term=link&utm_medium=social&utm_content=2020-02-01T00))
